

BioISI Research Seminar

KLEVER marketplace: the new tool for scientists

Orfeu Flores e Diana Rodrigues (STAB-Vida)

We welcome you to www.kleverscience.com, a peer-to-peer sharing platform that addresses the problems experienced by all productive laboratories: expensive equipment that is unused or underutilised, and restrictive budgets that hinder the purchase of badly needed reagents and equipment, and even expertise. Whether you need an expensive antibody, a centrifuge, access to an assay or help with publishing your work, KLEVER can help you to find the right partner and make a deal. This exclusive system created by STAB VIDA Lda allows you to advertise for free consumables and surplus equipment from your laboratory, or access unused materials from other laboratories, substantially saving for your projects. KLEVER is the new tool for laboratories, with which you can create a new source of income for research and education.

Host: Margarida Gama-Carvalho
(GER-BioISI)

When: December 7 🕒 11h00

Where: Building C2, room 2.4.16

Faculdade de Ciências da Universidade de
Lisboa -Campo Grande, Lisboa (Portugal)
